\$ 30.00

Important Information About School Purchased  
Combination Locks

Combination locks purchased through the school come with a special feature: an override key. This allows school staff to open the lock if a student forgets their combination. Instead of cutting the lock off, the override key can be used to open it safely. Once opened, the student can then reset the combination as needed.

This helps prevent damage and makes it easier to manage forgotten codes.

If you have any questions, please contact the school office.
