

STEM Academy

Our STEM Academy offers students an exciting opportunity to explore Science, Technology, Engineering and Mathematics through engaging, real-world experiences. Students will take part in hands-on investigations and collaborative projects that challenge their problem-solving and critical-thinking skills. Learning is enriched through incursions, excursions, and guest speakers who provide insight into STEM careers and innovations. Students will also have the chance to participate in Science competitions and apply their creativity using the latest in digital technology. The program is designed to spark curiosity, build teamwork, and inspire a passion for discovery that extends beyond the classroom.

From 2027, the STEM Academy is aligned with the Sport and Music Academies.
